

**Directions for use/Restrains: DO NOT apply if rain is expected within 2 hours of application may wash the chemical off the foliage and repeat treatment may be required.**

Situation	Weeds Controlled	Rate	Critical Comments
Public areas including parks, verges, gardens, playgrounds, school grounds, nurseries and rail lines. Spot spraying in lawns and turf.	Annual Weeds: Broad leaf weeds (e.g. Blackberry nightshade, Capeweed, Burr Medic), Creeping oxalis, Milk Thistle, Spear Thistle, Wireweed  Perennial Weeds: Broad leaf weeds (e.g. Flatweed, Hair Hawkbit, Lamb's tongue, Dandelion, Evening primrose), Couch grass, Paspalum, Perennial ryegrass, Kikuyu	6.3L/100L of spray solution	Apply to actively growing plants less than 30cm high. Spray to ensure complete coverage of unwanted plants to the point of run-off. Reapplication at around 14 days may be necessary if regrowth occurs. Perennial weeds and grasses may require repeated application to obtain long-term control. Optimal results are achieved when Contact Organics LocalSafe Weed Terminator Concentrate Herbicide is applied in full sun to small, actively growing plants. This product may damage lawn and turf when used as a spot spray.
Resistant weed control in the above situations.		9L/100L of spray solution	
Gardens, paths, rockeries, tiled roofs, walls, driveways, around buildings, spot spraying in lawns and turf.	Algae, Lichen Liverwort, Moss	6.3L/100L of spray solution	Spray to completely cover plant surface. On hard surfaces or heavy infestations, clean off by brushing after three days and reapply, if necessary. This product may damage lawn and turf when used as a spot spray.

**NOT TO BE USED FOR ANY PURPOSE OR ON ANY MANNER CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.**

**GENERAL INSTRUCTIONS:** Apply to actively growing plants less than 30cm high. Spray to ensure complete coverage of unwanted plants to the point of run-off. Optimum results are obtained when Contact Organics LocalSafe Weed Terminator Concentrate Herbicide is applied in full sun to small, actively growing plants. The recommended application rate for actively growing weeds at medium weed density is 500L/ha. If weed density is high, the application rate is increased. Spot spraying is typically conducted at an application rate up to 1000L/ha. For woody weeds and resistant weeds, the concentration of the spray mixture should be increased by 50% as per the Directions for Use table. Perennial weeds and grasses may require repeated application to obtain long-term control. Contact Organics LocalSafe Weed Terminator Concentrate Herbicide works by dehydrating the plant. Results are seen as browning and wilting, usually within hours of application. To be effective, Contact Organics LocalSafe Weed Terminator Concentrate Herbicide must come into contact with the green parts of the plant. Vinegar odour dissipates within 30 minutes to 1 hour.

**MIXING INSTRUCTIONS**

Do not mix or store in steel or galvanized tanks. Mix with clean water only. DO NOT mix more than is needed at any one time. Use only plastic lined, fibreglass, aluminium or stainless steel containers for mixing and application. Wash out spray equipment thoroughly after use. The use of a non ionic wetting agent is highly recommended

- 1 Half fill the spray tank with clean water and start agitation.
- 2 Add the required amount Contact Organics Local Safe Weed Terminator Concentrate Herbicide and the remaining water to the tank and mix thoroughly.
- 3 Add wetting agent, if required, near the end of the filling process to minimise foaming.

Always maintain adequate agitation during application and use tank mix promptly. This product may be corrosive to metal parts of the sprayer. Thoroughly flush tanks, pumps, and nozzles with water after use. The use of a coarse nozzle to achieve even distribution is recommended.

**RESISTANCE WARNING:** LocalSafe Weed Terminator Concentrate Herbicide is a member of Group Z a group of herbicides with unknown and probably diverse sites of action. The product has a desiccating action on weeds. For weed resistance management, the product is a Group Z herbicide. Some naturally occurring weed biotypes resistant to the product and other Group Z herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly. These resistant weeds will not be controlled by this product or other Group Z herbicides. Since the occurrence of resistant weeds is difficult to detect prior to use, Contact Organics accepts no liability for any losses that may result from the failure of this product to control resistant weeds.

**PRECAUTIONS:** Do not spray directly on humans, pets, exposed food, food utensils, or food preparation areas.

**PROTECTION OF CROPS, NATIVE AND OTHER NON-TARGET PLANTS:** DO NOT apply under weather conditions, or form spraying equipment, that may cause spray to drift into nearby susceptible plants, crops, cropping lands or pastures. **PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT.** DO NOT contaminate wetlands or watercourses with this product or used containers.

**STORAGE & DISPOSAL:** Store in the closed, original container in a dry, cool, well-ventilated area out of direct sunlight. Triple-rinse containers before disposal. Add rinsings to spray tank. Do not dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush or puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500mm below the surface in a disposal pit specifically marked and set up for this purpose, clear of weeds, desirable vegetation and tree roots, in compliance with relevant local, state or territory government regulations. Do not burn empty containers or product.

**SAFETY DIRECTIONS:** Corrosive. Attacks eyes and skin. Avoid contact with eyes and skin. When opening the container and preparing spray, wear cotton overalls buttoned to the neck and wrist (or equivalent clothing), elbow length chemical resistant gloves and face shield or goggles. Wash hands after use. After each day's use wash gloves, face shield or goggles and contaminated clothing.

**FIRST AID INSTRUCTIONS:** If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 131126, New Zealand 0800 764 766. If swallowed, do NOT induce vomiting. If skin contact occurs, remove contaminated clothing and wash skin thoroughly. If in eyes, hold eyes open, flood with water for at least 15 minutes and see a doctor.

**FIRST AID WARNINGS:** DO NOT inhale vapour when handling the concentrated product.
