

LocalSafe™

Weed Terminator + Soil Conditioner

Combining cutting-edge technology and scientific research with natural ingredients, Contact Organics delivers a breakthrough in effective environmentally friendly weed control. Contact Organics LocalSafe Weed Terminator is a naturally based herbicide formulated for high performance while LocalSafe Soil Conditioner supports soil quality. Our customer base consists of various municipalities, schools, vineyards, orchards, landscapers, home users and a mix of others.

The Weed Terminator is a non-selective bio-herbicide made from acetic acid for the control of annual and perennial weeds. It is suited for use in most situations requiring weed control.

Contact Organics Soil Conditioner

The LocalSafe Soil Conditioner has been designed to be applied in conjunction with the Weed Terminator. It conditions the soil and enhances water uptake and distribution. In addition, it feeds micronutrients and iodine to your soil to promote healthy growth and microbial activity. As such healthier soil microbiology reduces weed growth.

To ensure control of your weed environment do not deviate from the instructions.

The Weed Terminators are suitable for use in:

- ✓ Parks
- ✓ Verges
- ✓ Gardens
- ✓ Playgrounds
- ✓ School grounds
- ✓ Spot spraying in lawns & turf
- ✓ Nurseries
- ✓ Orchards
- ✓ Vineyards
- ✓ Other row crops
- ✓ Fence lines
- ✓ Bushland
- ✓ Fallow situations
