## Frequently Asked Questions

- Does it kill blackberry, capeweed, giant rats tail, woody weeds etc?  
Yes, it does. The Weed Terminators are **non-selective** and will kill annual and perennial weeds/grasses including glyphosate-resistant and invasive weeds/grasses. Complete coverage is required of the target plant.
- Will spraying the Weed Terminator affect the soil?  
The Weed Terminators support soil health and soil microbiology. A 2 year study at a USA University proved what we knew - the Weed Terminators support soil health. [Click here](#) to read the study.
- Are the Weed Terminators harmful to bees?  
No, Weed Terminator Spray Mixture is not detrimental to bees. Acetic acid, the active ingredient, is used in higher concentrations by bee keepers to fumigate beehives to treat Nosema infections or to disinfect equipment used by bee keepers.
- Where can I buy HomeSafe?  
You can order HomeSafe from our [online store](#).
- Can I order a concentrate online?  
Yes, our concentrate is called LocalSafe. You can order LocalSafe [online](#) too.
